SUMMARY

Software engineer and entrepreneur with a strong business track record. 4 years of experience working with the latest technology solutions. Skilled in full-stack web and iOS development.

EDUCATION

Full-time Software Engineering Immersive Program

App Academy
Jul 2021 - Jan 2022

Bachelor of Arts in Liberal Arts

King's College London
Sep 2016 - May 2019

SKILLS

Languages:

Swift, Python, SQL, JavaScript, CSS3, HTML5

Tools/Technologies:

iOS, Xcode, Foundation, UIKit, SpriteKit, PostgreSQL, Git, Unix, React.js, React Router, Docker, Redux, Flask, Express.js, Node.js, AWS

EXTRA-CURRICULAR ACTIVITIES

Published 7 programming articles on Medium

PROJECTS

Music.ly Clone

Jan 2022 - Feb 2022

- Developed a Music.ly (now called TikTok) clone with **AWS, React, JavaScript, Node.js, Python, Flask** and **PostgreSQL** that allows people to create, share and view short videos; Implemented functionalities such as user followings, user profiles, news feeds and video uploading.
- Designed and implemented a chunk-based video upload mechanism and workflow that handled internet disconnections during uploads and compressed videos by up to 70% to be stored on to **AWS S3**.
- Integrated OAuth for easy and secure user registrations and logins.

Friendstagram

Dec 2021

- Developed an Instagram clone with **React, Python, Flask** and **PostgreSQL** that allows people to share and view others' photo posts across the platform.
- Designed the database schema and models to store and manage 20,000+ rows of generated user and photo data

Health+

May 2021

- Built a MVC-based iOS application with **Swift, UIKit** and **Firebase** to monitor and record body temperatures for COVID-19.

DevShare (published on Apple App Store)

Apr 2021

- Developed a novel photo sharing iOS application with **Swift, Xcode, UIKit** and **Firebase** that included functionalities such as photo news feeds, photo postings and user follows/unfollows.
- Implemented RESTful APIs for CRUD operations and employed a MVVM (Model-View-ViewModel) and MVC (Model-View-Controller) hybrid architecture with Google Firebase authentication.
